### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P03021	FOR FURTHER ACTION	See Form PCT/IPEA/416		
International application No. PCT/NO2004/000181	International filing date (day/month/year) 18.06.2004	Priority date (day/month/year) 10.07.2003		
International Patent Classification (IPC) or national classification and IPC G01V1/38				
Applicant NORSK HYDRO ASA et al.				
	iminary examination report, establishes	ed by this International Preliminary Examining Article 36.		
2. This REPORT consists of a total of	f 5 sheets, including this cover sheet	•		
3. This report is also accompanied by	ANNEXES, comprising:			
a.   sent to the applicant and to the International Bureau) a total of sheets, as follows:				
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).				
□ sheets which supersede beyond the disclosure in Supplemental Box.	e earlier sheets, but which this Authorn the international application as filed	rity considers contain an amendment that goes I, as indicated in item 4 of Box No. I and the		
sequence listing and/or table	rreau only) a total of (indicate type an es related thereto, in computer readal isting (see Section 802 of the Admini	d number of electronic carrier(s)) , containing a ble form only, as indicated in the Supplemental istrative Instructions).		
This report contains indications relating to the following items:				
☑ Box No. I Basis of the opini	on	İ		
☐ Box No. II Priority				
☐ Box No. III Non-establishmer	nt of opinion with regard to novelty, in	ventive step and industrial applicability		
☐ Box No. IV Lack of unity of in	vention			
applicability; citati	nent under Article 35(2) with regard to ions and explanations supporting suc			
☐ Box No. VI Certain document				
_	the international application			
☑ Box No. VIII Certain observation	ons on the international application			
Date of submission of the demand	Date of complet	tion of this report		
03.02.2005	18.10.2005

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/NO2004/000181

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1-28

No: Claims

Claims

Inventive step (IS)

Yes: Claims

1-28

Yes: Claims

No:

1-28

Industrial applicability (IA)

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. - PCT/NO2004/000181

	Box No. I Basis of the rep	ort	
<ol> <li>With regard to the language, this report is based on the international application in the lang filed, unless otherwise indicated under this item.</li> </ol>		this report is based on the international application in the language in which it was ed under this item.	
	This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of:		
	publication of the interpretation	under Rules 12.3 and 23.1(b)) rnational application (under Rule 12.4) rry examination (under Rules 55.2 and/or 55.3)	
2.	2. With regard to the elements* of the international application, this report is based on (replacement sheets have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in report as "originally filed" and are not annexed to this report):		
	Description, Pages		
	1-15	as originally filed	
	, , , ,		
	Claims, Numbers		
	1-28	as originally filed	
	Drawings, Sheets		
	1/8-8/8	as originally filed	
	☐ a sequence listing and/or	any related table(s) - see Supplemental Box Relating to Sequence Listing	
3.	☐ The amendments have re	esulted in the cancellation of:	
	the description, pages		
	<ul><li>☐ the claims, Nos.</li><li>☐ the drawings, sheets/fi</li></ul>	gs ·	
	the sequence listing (s	specify): sequence listing (specify):	
	any table(s) related to	sequence isting (specify).	
4.	☐ This report has been estated had not been made, since the Supplemental Box (Rule 70.2)	blished as if (some of) the amendments annexed to this report and listed below y have been considered to go beyond the disclosure as filed, as indicated in the c)).	
	the description, pages		
	<ul><li>☐ the claims, Nos.</li><li>☐ the drawings, sheets/fi</li></ul>	gs	
	☐ the sequence listing (s	sequence listing <i>(specify)</i> :	
	<ul> <li>ir item 4 applies,</li> </ul>	some or all of these sheets may be marked "superseded."	

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1 Reference is made to the following document.

D1: US-A-4 617 518

- The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (abstract and Fig. 1) an electromagnetic streamer provided with transmitter electrodes and several pairs of receiver electrodes.
- 3 The subject-matter of claim 1 differs from this known system in that it combines electromagnetic and seismic sensors for sensing electromagnetic and seismic waves emitted by corresponding electromagnetic and seismic sources.
- 4 The subject-matter of claim 1 is therefore new (Article 33(2) PCT).
- The problem to be solved by the present invention may be regarded as improving the accuracy in reservoir mapping and monitoring.
- The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) because it is neither known from, nor rendered obvious by, the available prior art.
- 7 Claims 2-28 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

#### Re Item VIII

## Certain observations on the international application

- The application does not meet the requirements of Article 6 PCT, because claims 1, 5, 12,18 and 24 are not clear. The reasons therefor are the following:
- 1.1 The term "associated with" as used in claim 1 is too broad therefore resulting in that

the claim is not supported by the description as required by Article 6 PCT, as its scope is broader than justified by the description and drawings.

- 1.2 The term "generally", used in claims 1, 5 and 18, has no well-recognised meaning and leaves the reader in doubt as to the meaning of the technical features to which it refers, thereby rendering the definition of the subject-matter of said claims unclear.
- 1.3 Some of the features in the apparatus claims 12 and 24 relate to a method of using the apparatus rather than clearly defining the apparatus in terms of its technical features. The intended limitations are therefore not clear from these claims, contrary to the requirements of Article 6 PCT.
- 1.4 The expression "each receiver cable section arranged *in line with*" is not clear and thus it renders uncertain the definition of the matter for which protection is sough contrary to the requirements of Article 6 PCT.
- According to rule 6.4c dependent claims referring back to a single previous claim shall be grouped together in the most practical way possible, which is not the case of claims 20-28.
